

CPM Statistics Project

The CPM Statistics Project has not yet been published. But the following information was given at the MANA Conference in 2003. The following are from notes taken by Laurie Fremgen, CPM, who attended that MANA Conference.

Largest homebirth study in North America

7469 data forms received

29 median age

6.6% risk factors ruled out homebirth prenatally

12.7% transferred, most in the first stage

3.5% transfers were urgent

2.1% episiotomy (27%)

3.9% c.section (24%)

.6% vacuum (7%)

1% forceps (3%)

3% IV (86%)

5% AROM (56%)

9.6% EFM (93%)

5% Pit (53%)

2/1000 fetal deaths

93% breastfeeding at 6 weeks

* Percentage in () is taken from a general survey that was done of listening to mothers who answered questions about their births.
